

Samir Aghayev

Senior Mobile Engineer, Flutter

Baku, Azerbaijan · +994 50 851 90 76 · samir091718@gmail.com
linkedin.com/in/samir-aghayev · github.com/samiraghayev12

Flutter developer with 7 years in mobile. I have shipped 22 apps to the App Store and Google Play, mostly for retail, fintech and utility companies in Azerbaijan, with remote work for teams in the US and Israel. Most of what I build sits in the awkward parts of an app: payments, live maps, and real-time state that has to survive a bad connection. Currently leading mobile development at RTH under TABİB. Open to remote roles and relocation.

SKILLS

Languages	Dart, Kotlin, Java, Swift, JavaScript
Flutter	BLoC, Provider, RxDart, get_it, Clean Architecture, MVVM, platform channels, responsive and custom UI
Integrations	REST and Dio, WebSockets, Firebase (Firestore, Auth, Analytics, Crashlytics, FCM), OneSignal, payment gateways, Google Maps, OpenStreetMap, geolocation and foreground services, deep links, NFC
Working	Git on GitLab and Bitbucket, Jira, Scrum, App Store Connect and Play Console releases, Crashlytics monitoring, code review

EXPERIENCE

- Senior Flutter Developer**, RTH under TABİB, Baku 2024 – Present
 - Lead mobile development for healthcare applications.
 - Set the architecture the team builds on: Clean Architecture with BLoC and get_it, so features stay separate and testable.
 - Handle releases myself, from build flavors through App Store submission, then watch Crashlytics closely for the first week after each rollout.
- Senior Software Engineer (contract, remote)**, Fayton LLC, USA 2024 – 2026
 - Built the whole Fayton platform: the passenger app, the driver app and the website.
 - The core of it is the matching flow. Driver location, route creation, fare negotiation and order state all move over WebSockets, and have to reconcile when a driver loses signal between cities.
 - Wrote the location layer on Geolocator and a foreground service, batching updates so long intercity routes do not drain the battery.
 - Both apps are live on the App Store and Google Play.
- Senior Flutter Developer**, NMSOFT LLC, Baku 2024 – 2025
 - Built E-Bina and E-Bina Manager, property management apps covering balance top-up, payment history, service requests and intercom control.
 - Pulled the shared pieces into an internal package that later client apps started from, which took a few weeks off each new project.
- Middle Flutter Developer**, Jeykhun Imanov Studio, Baku 2023 – 2024
 - Maintained and extended existing Flutter apps, mostly e-commerce.
- Middle Flutter Developer**, NSPSolutions LLC, Baku 2022 – 2024
 - Worked across e-commerce, retail loyalty and payment apps.
 - Integrated card payments, FCM and OneSignal notifications, deep links and Firebase Analytics.
 - Used Crashlytics reports and DevTools profiling to bring down crashes and jank on apps already in production.
- Flutter Developer**, ELX LLC, Baku 2021 – 2022
 - Built both sides of a ride-hailing product, the driver app and the passenger app.
- Junior Flutter Developer**, Medium Creative Agency, Baku 2020 – 2021
 - Switched from Android to Flutter here. Shipped several client projects from scratch and kept Ofisait and Fraza running.

- First job. Maintained production Android applications.

SELECTED WORK

App names link to the store listing.

Shopping and retail

- [Irshad.az](#): electronics retailer with a 40,000 product catalogue, guest checkout and order tracking. 4.2★ from 273 ratings.
- [Ofisait.az](#): online store with coupon codes, lottery mechanics and nearby-store notifications. 4.6★.
- [Etta](#): cosmetics and beauty marketplace for an official distributor.
- [Əmin Bazar](#): loyalty app with a bonus wallet and a shake-to-reveal daily deal.

Payments and loyalty

- [Kassam.az](#) and [PayPark.az](#): payment and parking-payment platforms, mobile and web.
- [MyBanko](#): banking and payments application.
- [Norm Bonus](#): ordering and bonus redemption for Norm OJSC cement dealers. 4.2★.
- [NORM Ustalar Klubu](#): loyalty programme for trade professionals, with rewards and campaigns.

Transport, utilities and property

- [Fayton User](#): intercity rides and parcel delivery for passengers and senders.
- [Fayton Driver](#): the driver side, with route creation, fare setting and cargo acceptance.
- [Azerishiq](#): the national electricity operator's customer app: debt, consumption data, payment history and support chat.
- [E-Bina](#): property management, plus E-Bina Manager. Also built apps for Baku City Residence, Harmony Residence, Avenue Group and Huner Group.

Education, media and agriculture

- [UniMastery](#): instructors run branded courses, workshops and 1:1 sessions, with messaging and payments built in. Remote client, Israel.
- [Yeniavaz](#): daily news application.
- [Dr.Agro and Agroom](#): agriculture sector applications.

EDUCATION AND LANGUAGES

BSc Information Security, Azerbaijan Technical University, Baku

2019 – 2023

Languages Azerbaijani and Turkish (native), English (professional working proficiency, two years with a US-based team), Russian and Georgian (elementary)

Outside work I play guitar, and I pick up new languages the same way I pick up new frameworks.
